### DETAILED ACTION

1. This application claims priority from provisional patent application no. 60/278905 filed on March 26, 2001.
2. This application is the parent of patent application no. 10/959,704 filed on October 06, 2004 and 11/016,388 file on December 17, 2004.
3. In response to the communication dated 10/06/2004, claims 22-28 and 56-70 are pending for further processing.

### *Double Patenting*

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 22-28 and 56-70 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 11/016388 filed on 12/17/2004. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the copending application are

Art Unit: 2161

substantially similar in scope to the claims of the present application. In particular, the copending application recites a "device" [claims 1-7] with various "means" which is an obvious variation of the "method" [claims 22-28], "computer readable media" [claims 57-63], and "computer" [claims 64-70] of the present application. Similarly, the copending application recites a "system" [claim 8] with various "means" which is an obvious variation of the "system" [claim 56] of the current application.

6. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
